

Public Safety Solutions

SitchAware

Active shooter detection is something we have to talk about. It's nearly a daily occurrence in the US. Most education, government, hospital, and public buildings have little to no active shooter processes or detection capabilities in place. We believe detection and notification is only the first step. Stopping and apprehending a threat while protecting innocents are vital during these life or death situations.

V5 SYSTEMS OUTDOOR EDGE SECURITY PRODUCTS

V5 Systems provides innovative technology that enables intelligent applications to run outdoors on portable, self-powered platforms – to gather, analyze and relay intelligent insights without the need for fixed power or wired communications. Quickly deploy smart security solutions in any outdoor environment to secure a perimeter, a remote location, a critical or cost-prohibitive area without being tied to the electrical grid.

FirstNet™ - First Responder Network Authority

FirstNet is poised to transform the future of public safety communications for first responders -- including firefighters, law enforcement and emergency medical services personnel in all 50 states, 5 U.S. territories, and Washington D.C. Through a public-private partnership with the First Responder Network Authority, AT&T will build, deploy, operate, and provide services on the nationwide public safety broadband network. Currently, FirstNet services are available over AT&T's existing nationwide multi-band network, including priority and preemption.

Cradlepoint COR IBR1700

NetCloud Solution Packages with the ruggedized IBR1700 LTE router are designed to extend the value of SD-WAN to mobile networks in vehicles, mobile command centers, or anywhere robust networking with wireless WAN connectivity is required. It offers five Gigabit Ethernet ports and three-radio Gigabit Wave 2 ac WiFi. NetCloud Solution Packages include NetCloud software, a router, and 24x7 support with Limited Lifetime Warranty on hardware.

BODY-WORN CAMERA

Get complete situational awareness in your most critical scenarios. The Body-Worn Camera delivers panoramic, full-HD video, even in low-light conditions. With one of the smallest and lightest designs in the industry, up to 12 hours of full-shift battery life and a wide range of communication features, it can go wherever you need, whenever you need it.
