

Dedicated, prioritized connectivity for those who risk everything

A solution built to their specifications

- A communications ecosystem and core being purpose-built exclusively for first responders
- A commitment to grow coverage to rural, tribal and U.S. territories specifically for public safety
- Delivery of priority and preemption capabilities, an exclusive public safety core, application ecosystem, deployables and mission critical services – all required by the government contract

Highly reliable and extensive coverage

- A contractual commitment to build a network designed to meet a 99.99% service availability objective – a standard unmatched by any other large-scale LTE network in the world today
- A commitment to grow coverage to rural, tribal and U.S. territories specifically for public safety
- Public safety Band 14 deployment planned to 95% of America's population
- Deployables dedicated exclusively for public safety – for planned activities and disaster recovery
- Local control of users and applications and the ability to give others priority access to the network
- A network backbone that supports integration with Next Generation 9-1-1 and Smart Cities public safety applications – ensuring emergency work/call flows are available to public safety

First Priority®

- First Priority, which means first responders connect first – you don't have to compete with non-emergency users for a connection
- Preemption will make sure first responders have the bandwidth you need by detouring others off the network. This works like vehicle traffic being routed off the highway to make room for emergency personnel

Unprecedented level of network security

- Building a physically separate dedicated core with end-to-end encryption
- Single sign-on and federated identity, providing ease of use and integration between the network, applications and public safety databases
- A robust and highly secure device ecosystem – with a broad portfolio of devices enabled for multiple bands, including Band 14
- Dedicated security operations center to monitor the network (24/7/365) and mitigate threats

Critical interoperability

- Building a dedicated, interoperable network, and ecosystem
 - Building a dedicated public safety application store with certified, public-safety relevant, highly secure and interoperable applications
- A public safety application development program that fosters interoperability and facilitates access to new public safety applications
