A three-step installation process makes this video surveillance solution a snap.

Cloud-Based Video Hosting

Consumers & Small Business

Simple to set up, yet powerful cloud-based video surveillance

IvedaXpress is a simple, yet powerful surveillance solution for your home, office or business on-the-go. This portable, plug and play solution consists of Axis cameras and Iveda Solutions cloud-based video surveillance services. Together, they provide an inexpensive and easy to install enterprise level surveillance solution. Especially designed with consumers and small businesses in mind, IvedaXpress eliminates the many hours of network setup and upkeep.

A three-step installation process makes this video surveillance solution a snap. Simply plug it in, log in online and begin watching your cameras from any Internet-enabled device from anywhere.

- Portable, plug & play
- No software to install (Web Based)
- No recording device required (DVR)
- 24/7 access to live & archived video
- Only camera, Internet & power are needed

Simple Surveillance Solution (Home, Office, Business On-the-Go)

- One login, one Web browser
- Secure remote data storage
- No DVR to get stolen or destroyed
- Cost effective economical pricing and service plans
- Video is viewable on iPhone or Android through HVR Mobile

With Iveda Xpress you don't have to worry about:

- Network configuration or router compatibility
- Using static IP address or dynamic DNS
- Changing firewall configurations
