

# When Students and Faculty Feel Protected, Learning Thrives

## CREATING SAFE LEARNING ENVIRONMENTS WITH RAPID OUTDOOR SECURITY

As campus administrators, police and IT professionals, providing peace of mind to those entrusted to your care comes with a unique set of challenges. Typically getting a budget approved for improving school infrastructure can be a daunting process. Proponents have to make the case that bringing new technology will enhance student's quality of life in a realistic way and prove far more effective and worthwhile than existing solutions.

What if there was a solution that allowed you to expand outdoor security without the need for fixed power that can be deployed in under 30 minutes per unit?

*“ Every time there is another shooting we get another round of what are we doing to prepare? The nice thing about the system is just how easy it is to use. ”*

Alan Cavallo  
Captain, University Police  
San Jose State

Challenge	Solution	Results
UCLA Move-in Weekend is always a hectic influx of students and parents into the residence halls. UCLA has outdoor areas and transit points to secure, but no easy or fast access to power and communications infrastructure.	Deploying outdoor, self-powered security rapidly for this annual, multi-day event with V5 Camera Adaptive Platform (V5 CAP) with Axis Dome Cameras	Avoided \$750,000 per mile trenching fees. The V5 CAP was compatible with UCLA's preferred camera provider, allowing the school to retrofit its security as opposed to completely replacing it.

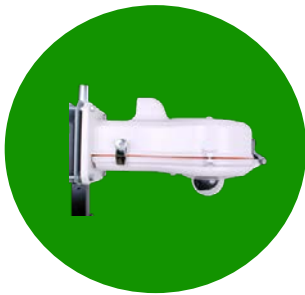

## Be There, Even Without Fixed Power

You grapple with high concentrations of people, blind spots all around campus, and multiple crowd-heavy public events. V5 Systems' self-powered solutions act as a force multiplier and give you freedom from fixed infrastructure and lets you:

- Quickly deploy security without expensive and lengthy trenching and permitting
- Benefit from flexibility with easy-to-use portable security that can be moved around for special event coverage
- Protect your campus community with rapid mobile alerts

Crime Doesn't Sleep, It Moves	Respond Proactively	Protect Students and Faculty
With a flexible second pair of eyes and ears, your campus police department and personnel can reallocate manpower to other campus priorities. Quickly redeploy these 25-pound devices as needed, giving you flexibility and scalability.	Rapid, AI-driven mobile alerts mean that you have information at your fingertips instantaneously, allowing you to respond rapidly to threats on campus. These alerts provide you with the verified data you need to create risk prevention and risk containment strategies.	You make countless, split-second risk assessments every day to promote an environment where students can thrive. Safer learning is achievable today with V5 Systems.

## Customizable Solutions to Fit Your Needs

### V5 Portable Security Unit – Analytics (V5 PSU-Analytics)

Rapidly deploy pre-configured, self-contained security units with advanced analytics. Detect people and vehicles in sensitive zones to safeguard your project infrastructure.

### V5 Portable Security Unit – Streaming (V5 PSU-Streaming)

Want easy-to-use insight for your site surveillance needs? V5 PSU-Streaming gives you 24/7 live video feed from anywhere.

### V5 License Plate Reader (V5 LPR)

V5 LPR solution that allows you to identify and record license plates on still or moving cars. Maintain your site integrity without having to trench for power and connectivity.

### V5 Portable PTZ Unit (V5 PSU-PTZ)

Pan, tilt and zoom functions allow you to remotely control your viewing area. Great for wide site coverage and details when zooming in.
