

Combat Street Gang Violence - Fast

BE TWO STEPS AHEAD WITH PORTABLE TECHNOLOGY

When gangs destabilize a community, experienced investigators establish patterns of behavior with the goal of responding rapidly. As gang crimes span multiple jurisdictions, you can combine your insight with portable, self-powered technology that allows you to move quickly based on current crime trends. V5 Portable Security Units (V5 PSU) and V5 Acoustic Gunshot Sensors (V5 GSL) will help you to assess, preempt and combat gang violence with revolutionary speed.

A Rapid and Flexible Solution

- Each self-powered unit can be deployed in under 30 minutes.
- Units can be moved to different locations rapidly to respond to trends in real-time.
- AI-driven alerts send accurate alerts in real-time to your mobile device, allowing you to respond with confidence.

“Portability saves money and also gives you the flexibility to move things around. In the world of ‘hotspot policing,’ you put your resources where the most problems are. This acts as a force multiplier, saving on personnel, while still providing the eyes and ability to follow-up on events after they’ve occurred.”

James Randol,
Retired Police Captain

How the V5 Acoustic Gunshot Sensor Helped to Capture a Moving Serial Shooter

Challenge	Solution	Results
A Silicon Valley city was terrorized by a serial shooter who fired at moving vehicles over a period of four months.	V5 Acoustic Gunshot Sensor (V5 PSU-GSL), a portable solution to capture and localize sources of gunfire, sending validated real-time alerts to officers' phones via an app.	Within a month, officers were able to move the units 12 times, allowing them to ultimately home in and catch the serial shooter

Customizable Solutions to Fit Your Needs

Proactive Hotspot Policing

Stream live video or on-demand and gain real-time access to your streets with a self-powered HD video solution that can be deployed in under 30 minutes per unit, allowing you to move preemptively.

Preempt Gang Violence Movement

With a second pair of eyes and ears that weighs less than what's on a tactical belt, your officers can redeploy these all-in-one 25-pound devices as gang violence shifts, giving you flexibility and scalability to deal with rapidly changing situations.

Rapid Real-time Alerts

The best defense is a nimble offense, and AI-driven real-time alerts sent via app and web browser give you critical situational awareness.

V5 Portable Security Unit – Analytics (V5 PSU-Analytics)

Rapidly deploy pre-configured, self-contained security units with advanced analytics. Detect people and vehicles in sensitive zones to safeguard your project infrastructure.

V5 Portable Security Unit – Streaming (V5 PSU-Streaming)

Want easy-to-use insight for your site surveillance needs? V5 PSU-Streaming gives you 24/7 live video feed from anywhere.

V5 License Plate Reader (V5 LPR)

V5 LPR solution that allows you to identify and record license plates on still or moving cars. Maintain your site integrity without having to trench for power and connectivity.

V5 Acoustic Gunshot Sensor (V5 GSL)

The V5 GSL is the world's first wireless, portable, solar-powered Gunshot Locator (GSL) device. By continuously monitoring ambient environmental audio, the sensor is able to both detect and localize the source of gunfire and provide real-time location information for each gunshot event through artificial intelligence.
