

### Public Safety Solutions

#### SitchAware

Active shooter detection is something we have to talk about. It's nearly a daily occurrence in the US. Most education, government, hospital, and public buildings have little to no active shooter processes or detection capabilities in place. We believe detection and notification is only the first step. Stopping and apprehending a threat while protecting innocents are vital during these life or death situations.

#### ELD Bundle Solutions

The ELD mandate states that drivers are required to maintain records of duty status (RODS) using an electronic logging device. This helps to create a safer driving environment. Gamber-Johnson's logistic products bundled with a tablet computer offers a safe and ergonomic solution when on the road. Our numerous cradle options offer all-day charging capabilities and our mounts are easy to install and provide a sturdy platform for a variety of devices.

#### FirstNet™ - First Responder Network Authority

FirstNet is poised to transform the future of public safety communications for first responders -- including firefighters, law enforcement and emergency medical services personnel in all 50 states, 5 U.S. territories, and Washington D.C. Through a public-private partnership with the First Responder Network Authority, AT&T will build, deploy, operate, and provide services on the nationwide public safety broadband network. Currently, FirstNet services are available over AT&T's existing nationwide multi-band network, including priority and preemption.

#### Cradlepoint COR IBR1700

NetCloud Solution Packages with the ruggedized IBR1700 LTE router are designed to extend the value of SD-WAN to mobile networks in vehicles, mobile command centers, or anywhere robust networking with wireless WAN connectivity is required. It offers five Gigabit Ethernet ports and three-radio Gigabit Wave 2 ac WiFi. NetCloud Solution Packages include NetCloud software, a router, and 24x7 support with Limited Lifetime Warranty on hardware.

#### MilDef Rack Solutions

MilDef designs and manufactures Rugged C4ISR computer solutions for Military. Specializing in Rugged Mobile Computers and Rack Mount Networking Systems. Custom configured systems design and built to application requirements. Experts in modified COTs solutions; Connectors, PC board and wireless card integration and Compact size Rugged Networks Systems.
