Wind Image™

### For ArcMap

Seamless Image Integration into ESRI ArcMap Software

Highlights:

- Supports all coordinate systems currently supported by ArcMap.

- Process GPS track-logs into line or point datasets.

- Create Shp files and ESRI Feature classes

- Supports all ESRI Geo-database types Personal, File, and ArcSde.

- Process photos into hyperlinked and raster embedded datasets.

- Robust set of photo editing tools.

- Photo thumbnail viewer.

- Imprint date time, GPS position, and attributes on photos.

- Native support in both ArcMap and ArcReader for viewing raster embedded datasets.

- Single license can be installed on two computers as long as they are only used by one user. Such as a laptop and desktop PC.

- One year of updates included.

- Automatic rotation of symbology based on compass direction.

- Add processed images to map display for easy printing.
